Police Capture Thief Six Months Later

Vigilance is Rewarded and Effective Work in Tracking Movements of Burglar Brings Arrest

My object all sublime,
I will achieve in time,
To let the punishment fit the crime.

The punishment fit the crime. Well might this illustrate the discovery of the thief who over six months ago broke into Coleman Hardware Co. store and stole various articles, including two small rifles. The police were unable at the time to secure direct evidence, though they had a young man under suspicion. He later moved to Lethbridge, but was kept under observation by the police, unknown to himself, of course. Subsequently some of the stolen articles appeared, two of which were offered to a pawnshop. This proved the clue which the police had been looking for.

A search warrant was soon obtained, and additional proof of the burglary in Coleman was secured. W. Dutil, proprietor of the store was able to positively identify the stolen goods.

The thief, named John Thomas Ronliver, was brought to Coleman for trial before Magistrate Gresham, and given six months hard labor in Lethbridge jail.

Thefts From Railroad Box Cars

Investigation is proceeding this week of the thefts from box cars on the C. P. R. here. Officials of the company traced two cars as having been broken into at Coleman. These cars were on the way freight from Calgary to Cranbrook. By one officer working from Lethbridge and another from Cranbrook, direct evidence was eventually obtained to prove the cars were broken into in the yards here. To climax the investigation, as one of the officers was looking around the yards on Wednesday morning, he met two young lads carrying off some of the goods which had been stolen, and which had been cached in the coke ovens.

Other evidence was obtained from boys who had received some of the stolen goods, consisting of chocolate bars and candies. Acting in co-operation with Constable Houghton, the parents of the boys were visited, and it is likely they will appear for trial in the juvenile court.

Interest Increasing in Play "It Pays to Advertise!"

Frank H. Graham, F. G. Creagan and Mrs. Alex. Cornett are the committee on ticket selling for the play—"It Pays to Advertise!" to be presented in the Opera house on Friday, April 24, sponsored by the vestry of St. Alban's church. Reserved seats are now on sale at Rushton's store. Persons having general admission tickets may exchange them for reserved by paying an additional 25c at Rushton's store. Reserved seats should be purchased early, as the plan will in all probability be sold before the opening of the performance. A matinee for children only will be held at the close of school.

Car Smashes on Sunday

Hugh Dunlop, driving a Pontiac car, ran off the highway into the ditch near Burnis on Sunday afternoon, completely turning over the car, which righted itself on its wheels, smashing the glass and one of the wheels. None of the passengers were injured beyond a shaking up.

Joe Uhrich, also driving a Pontiac, ran into the ditch between Coleman and Blairmore, breaking off his steering wheel, smashing windows and badly damaging the framework. Five passengers were in the car, all escaping injury.

It's The Law

People laughed when they read an Associated Press dispatch the other day from Boston telling of an old farmer who drove into the city of culture with his horse and buggy, walked into the leading hotel, registered and asked the clerk to look after his horse. The clerk argued, but the old farmer said: "It's the law." And so it was the law, and a place was found in a nearby garage for Dobbin.

Strange as it may now seem, the same sort of law is still on the statute books in British Columbia. Hotels must make provision for both man and beast. Therefore, if a farmer from St. Mary's prairie, for instance, should drive into Cranbrook and hitch his horse in front of the Cranbrook Hotel or the Mount Baker Hotel and go in and register, he could demand of George Smith or Teddy Clausen that his steed be also taken care of. "It's the law."—Cranbrook Courier.

Mrs. J. Parkinson was being seriously ill, the cause being hemorrhages of the lungs. Her condition caused her husband and friends great anxiety.

Kid Hughes Wins C.N.P. Championship

Boxing Card Last Night at Opera House Gave Fans a "Kick"—Coleman Challenger Surprises

Kid Hughes, junior walter weight champion for Alberta, was given the decision over "Cyclone" Russell in a ten-round bout for the championship of the Crow's Nest Pass. Hughes weight was 140; Russell 160. Russell has a longer reach than Hughes, therefore was able to hold Hughes off. It was a good bout; Russell made a good showing, considering it was his first appearance in public. The boys were given a generous round of applause, and fought a clean battle. The support among the fans appeared to be about 50-50.

In the semi-final Kid Winters of Drumheller and Ivor Bolt of Coleman put up a spirited three round contest. Bolt, the Coleman blacksmith, originally from Scotch Wales, had the advantage in weight, 140 lbs, against Winters' 128, but it was a very even go, and the boys certainly worked in with out mercy to each other. It was the peppiest bout of the evening. Kid Winters was given the decision. He is the challenger for the provincial feather weight championship.

In the preliminaries Uhrin and Ukrainitz, two Blairmore boys, gave the fans a treat. Ukrainitz won. They were in deadly earnest, and some were of the opinion they were the scariest gladiators of the evening.

Max Eberts of Michel filled in with a three round go against Jimmy Anderson of Coleman, the latter being given the decision. They put up a good competition, many being of the opinion they outdid the Blairmore boys.

Terry McGovern and Dick Hughes of Michel and Natal, gave a three rounds exhibition. McGovern taking the place of Garrett, of Coleman, whom Hughes did not feel equal to tackle owing to Garrett's advantage in weight.

The younger boys amused the fans. Tony DeCecco and Elidio Salvador can always be counted on to make an even tussle, and the boys did well. DeCecco was given the decision in a three round bout.

Willy Hatfield and Roy Garrett, juveniles, boxed three rounds, and proved themselves dead-game sports, putting up a good exhibition of the manly art for their age.

Big Bill Burrows refereed the preliminaries, and Danny Lewis of Blairmore the main bout and the semi final.

Frank Barringham, Coleman, and Roy Tabor, Michel, were the promoters.

OUR QUESTION BOX

The answer to last week's question was correctly given by five who replied, the highest navigable lake in the world being Lake Titicaca, situated partly in Bolivia and partly in Peru. It is about the size of Lake Ontario and is 11,800 feet above sea level.

Replies were received in the following order: Mary Hoyle, Betty Garner, Charles Maurer, Myrtle Johnston, David Jones of Grade VI. West Coleman, all being correct. Thomas Goldring gave Lake Superior as his answer. A year's subscription has been placed to the credit of Mary Hoyle.

This week's question is "Who was Senacherib?" In order to give everyone replying an even chance, the replies will be placed in a box, and the first correct answer drawn at 5 p.m. on Tuesday will be the winner. Send replies to or leave at The Journal. Mark "Contest" on envelope.

District Deputy to Visit Mooseheart Legion

On Friday evening, April 10, at 9 p.m. Blairmore Chapter of the Women of Mooseheart Legion will be honored by a visit from district deputy grand recorder, Legionaire C. M. Walker. She is visiting all chapters. This is the first time a member of Canada has held this honor. She will give a class of instruction and a lecture on the aims and objects of the order. Legionaire Walker will arrive on Friday morning and will be the guest of honor at a social to be held at 8:30 p.m., which all Moose members and Legionaires are cordially invited to attend. A special program has been arranged.

Farewell Social by Masons

A number of members of the Masonic lodge met on Monday evening for a social gathering, and to make a farewell presentation to W. J. Burns, who is a past master of Summit Lodge. The presentation was made by A. F. Short, who referred to his many years of pleasant association with Mr. Burns. Others who spoke were R. F. Barnes, Sam Moores, Archie McCulloch, Arthur E. Graham, chairman, and H. T. Halliwell. A very appetizing lunch of "hot dogs" and strong coffee was served, and songs and choruses enlivened the evening till midnight. Mr. Burns intends leaving at the end of the week.

Junior Red Cross in Coleman

The members of Cameronian branch, Junior Red Cross, with thank all who helped by buying magazines, Christmas seals and with contributions of eggs.

The branch has 47 members, and has received two banners for 100% membership. Since the beginning of the school year, 165 magazines and 80 packages of Christmas seals have been sold. \$25 has been sent to Red Cross headquarters and a case of 30 dozen eggs to Calgary Junior Red Cross hospital. The funds in the bank at present amount to \$1.80.

ST. ALBAN'S CHURCH

Low Sunday, April 12—Sunday school 2 p.m., adult bible class 3 p.m., festival evening and sermon 7 p.m.

The choir will sing the anthem "Awake thou that sleepest."

Harry Lewis is a cheerful soul, despite misfortunes heavy enough to try any man. Years ago while mining in British Columbia, he lost an eye; for a year he was in hospital here with a compound fracture of the leg, received in an accident in McGillivray mine, and as an unfortunate climax the sight of his remaining eye failed so that he is blind. Yet he takes it with a smile, and has not a word of complaint; truly an example of fortitude. He anticipates returning to Wales, having no relatives in Canada. His good Samaritan Sebastian Alexander, who pilots him on his daily walks and attends to his creature comforts. The miners union officers it is reported are making arrangements for his return to his homeland.

The programme of the concert held on the occasion of the United church anniversary last week was as follows: Songs by Mrs. Ashbridge, Miss Irene James, Mr. Alf. Phillips; a recitation by Mrs. Holmes; duets by Mrs. Larke and Mrs. Allan, and Miss James and Mrs. Ashbridge; violin solos by Mr. Harris; selections by the male voice choir. Mr. James Fairhurst was chairman.

Notes on Play "It Pays to Advertise!"

"Independent young son of soap king fights father, and kicks him too, by George! Down with monopoly. Burial for the people down with the trust!"—Rodney Martin, portrayed by A. E. Graham.

"Rodney a business man? Ha! Ha! That's the funniest thing I ever heard of. You want to borrow five thousand dollars! Here's ten!"—William Smith, portrayed by C. J. Devine.

"Maybe you think love is important? Piffle.... Advertising, my boy, the power of suggestion; the psychology of print. What made Anna Held?—Milk baths. What made Gaby Deslys? A Portuguese prince."—Ambrose Peale, portrayed by Sidney Short.

"The Comtesse said the American men were splendid but the women were all crazy and they could all go to.... Blazes!"—Marie. Portrayed by Alice McIntock.

"I'm a business woman. Even if your son did love me—I wouldn't marry him. Just now he's twenty-four, with an india rubber heart; easy to stretch and easy to snap back." (But she did)—Mary Grayson. Portrayed by Edith Hayson.

"I remember when I was a young man there was a girl. My heart was broken for a week—perhaps ten days. I went down to the club one night and got spiffed.... However.... However....!—Cyrus Martin. Portrayed by R. F. Barnes.

A sitting of the District Court of Macleod was held yesterday in the council chamber, which was dignified for the occasion by laying a carpet. Judge McDonald presided and two applications for naturalization were heard. R. F. Barnes barrister, appearing for the applicants.

Coleman Male Voice Choir Won at Festival

Very Close Competition—Adjudicator Gives One Point in Coleman's Favor

Congratulations are in order to Coleman glee club, and the conductor, Mr. T. Elgar Roberts. The competition at the musical festival at Blairmore between Coleman and Hillcrest men's choirs was very close, as the award of one point above Hillcrest indicates.

It is the general opinion that had Coleman not switched its choice of test pieces at the last moment, they would have won by a wider margin. However, it is very gratifying to learn of their success, as it is the first time for many years that a male voice choir from Coleman has appeared in competition.

Local News

Mrs. Wilson and Violet were visitors to Lethbridge.

Mr. and Mrs. A. F. Short and children motored to Calgary.

Mrs. G. R. Powell was taken seriously ill last evening.

Mrs. Roddy McLeod is visiting friends at Red Deer.

The Misses Emily Greenhalgh and Dora Burrows have left to teach school in Edmonton district.

Mr. and Mrs. J. A. McLeod and children motored to Edmonton and Sylvan Lake for a few days with their friends.

Jimmy Joyce, who made such a splendid record as left defender on Coleman Canadian hockey team, is taking up residence in Coleman. He is working for the International Co. This will be good news to the hockey fans, who admired Jimmy's solo rushes in his play on the team here.

Where West Leads The East

General recognition is accorded to the fact that the West leads the East in grain and livestock production. It is known that the Western Provinces have a greater railway mileage per capita than the older settled provinces. It is an established and recognized fact that there are more rural telephone per capita in the West than in the East. It is not so well known that the West leads the East by a wide margin in the field of aviation. Yet such is the case as disclosed by the first annual report of Canadian Airways Limited, recently issued.

According to the report of this company, which is an amalgamation of all the large aviation companies in the Dominion, and in which the Canadian Pacific and Canadian National Railways are now largely interested, the amount of air business done in the West far outstrips the volume of Eastern business, and that operating conditions in the West are more favorable with the result that there is less non-productive flying and consequently greater profits here than in the East.

The figures given in this report will prove most illuminating and interesting to western people. They cover twelve months operation of the Eastern lines, and thirteen months operation of the Western lines. It is shown, for example, that the total mileage flown in the East was 754,196 miles, as compared with 1,213,925 miles in the West. Total flying hours in the East were 7,886, but with the Western total 13,137, or almost twice as great.

But it is when one comes to a consideration of the amount and value of the business transacted, and the efficiency in operation, that the ascendancy of the West over the East in flying is most strikingly illustrated. Mail matter carried over Eastern lines amounted to 128,430 pounds, while the corresponding figure for Western lines was 207,483 pounds. Freight and express carried on the mail planes in the East was greater than in the West, being 14,971 pounds as compared with only 307 pounds, but freight and express carried on other than mail planes tell an entirely different story and reveal the extent to which this form of transportation has been developed in the West. No less than 404,010 pounds of package freight and express was transported by air in the West, as against 82,151 pounds in the East. In other words, the East has not developed this department of air service, apart from the regular mail planes, to anything like the extent that has been done in the West.

In passenger traffic, both on mail planes and other aerial services, an even more surprising record has been established by the West, showing that our people are becoming air-minded. The number of passengers carried on mail planes in the East was 289, and in the West 3,246; on planes other than the mail planes, 1,447 Eastern people travelled by the air route, while in the West 3,898 chose the same method. Considering the much larger population of the East the fact that 7,054 Western passengers travelled by air as compared with 1,746 in the East speaks eloquently for this Western country.

This Western preponderance in the air has no doubt partly accounted for the fact that the West is now regarded as an ideal country for flying operations, and also because of the further fact that distances between points to be reached are much greater in the West than in the East. That the West is well adapted to flying is demonstrated by the figures of mail efficiency contained in the report under review in this article. Out of a scheduled or possible mileage in Eastern Canada of 677,034 miles, only 558,264 miles were actually flown, leaving a lost mileage of 118,770, or only 82.4 per cent of efficiency. In the West, on the other hand, out of a scheduled or possible mileage of 754,178, productive mileage flown totalled no less than 708,544, leaving only 55,634 miles lost and representing an operating efficiency of 92.7 per cent.

The lighted airways of the West, making night flying practicable and safe, and the very fine municipal airports now in existence and being steadily improved, coupled with the excellence of flying conditions in general throughout the prairie country, provide an assurance that air transportation will more and more prove an important factor in the life of Western Canada, and in all probability a greater factor here than in the older sections of the Dominion.

World's Grain Show

Philippine Islands To Have Exhibit At Big Show To Be Held In Regina

The Philippine Islands are to exhibit at the forthcoming World's Grain Exhibition and Conference at Regina, in the summer of 1932, both in the competitive classes and in the educational exhibit section. The unit in charge of these displays will be the College of Agriculture, of the University of the Philippines, and Dr. B. M. Gonzalez, dean of the college, and Prof. N. B. Mondiola, of the Department of Agronomy, supervising.

PAIN

No matter how severe, you can always have immediate relief:

Aspirin always stops pain quickly. It does it without any ill effects. Harmless to the heart, harmless to anybody. But it always brings relief. Why suffer?

ASPIRIN
 TRADE MARK REG.

W. N. U. 1884

Expect Heavy Exports

Of Canadian Cattle

Greatly Increased Market In Old Country Predicted

Cattle exporters and those in close touch with the cattle-raising industry in Ontario and the West, estimate that at least between 15,000 and 20,000 head of cattle will be exported to Britain this summer.

Some exporters think Canada will have more than 20,000 head to export, one estimating as high as 100,000, but in view of the heavy domestic consumption this seems to be generally considered improbable. In 1925, this country shipped 110,868 head to Britain, but since then the shipments dropped off steadily to very small proportions. The British embargo against Canadian cattle was lifted in 1923.

In 1932 it will be possible to ship cattle from the port of Churchill and many supporters of that port think this will greatly lower the costs for cattle on the prairies.

Editor—What do you mean when you write, "The statement is semi-official?"

Reporter—Mrs. Gibson, wouldn't talk, so I got the story from her husband!

And the relatively small number of railway wrecks may be due to the fact that the engineer never hugs the fireman.

Canada Well Advertised

Descriptive Booklet Was Distributed At Buenos Aires Exhibition
 Canada was well advertised at the Buenos Aires exhibition in the Argentine Republic, fifty thousand copies of an artistically-designed booklet descriptive of this country having been sent to the exhibition for distribution. The booklet is written in Spanish and so is the wording on a series of beautiful pictorial blotters that were distributed with it.

The publicity branch of the Department of Trade and Commerce produced the booklet, which is of a quality reflecting credit upon the publicity director, H. E. M. Chisholm. The author does not forget to tell his South American readers that Canadians invented the telephone, originated the idea of standard time, built the first submarine telegraph, made the first electric stove, discovered insulin and did other remarkable things. Many of our own citizens would profit from reading what the blotters has to say about our form of government, our national resources and the characteristic features of the country.—Toronto Star.

Novel Christening

Cracked Ice Is Used To Christen Submarine That Will Cross Arctic Ocean

They used cracked ice to christen the "Nautilus," the record-setting submarine in which Sir Hubert Wilkins plans to cross the Arctic Ocean this summer.

The cracked ice was contained in a small silver barrel perched on the prow of the vessel. Lady Wilkins yanked a string and the barrel discharged its eminently symbolical contents—symbolic because the "Nautilus" will attempt to cross the top of the world under ice floes, coming up now and again for air and observations.

Acids In Stomach Cause Indigestion

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, flatulence, etc., are caused by an excess of hydrochloric acid in the stomach. The following simple diet is irritating, digestion is delayed and food is not properly assimilated. Symptoms which every stomach sufferer knows well.

Artificial digestants are not needed in the treatment of the stomach. The only way to get rid of the acid is to eat a diet of bland, easily-digestible food. Blandness and take in water after eating. The bland diet, which is simple, prevents the formation of excess acid, and therefore prevents the burning, flatulence, etc., which are the result of the acid. Blandness (Milk and water) is the best food for the stomach. It is harmless to the stomach, inexpensive to take and in the most effective form of magnesium for stomach purposes. It is used by the thousands of people who find their meals with no more fear of indigestion.

Three Ingredients Needed

A blizzard calls for three ingredients, and must have all of them: cold, high wind, and a heavy snowfall, with the latter not so important as the first two because cold and a high wind to keep the snow in the air can create the impression of a heavy snowfall even when it is comparatively light.

The Family Physician.—The good doctor is always worth his fee. But it is not always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, bruises, and sprains. The presence of this remedy in the family medicine chest saves many a fee.

A Secret Expedition

A. Innes Taylor, only Canadian to accompany Byrd on his Antarctic expedition, has arrived at Vancouver from White Horse, Yukon, to admit that he is soon to join another expedition of exploration which, however, he declared he had been ordered not to reveal. The expedition through out, he stated, is to be conducted in secrecy. Formerly a member of the R.C.M.P., he had charge of all the huskies with Byrd.

He who will learn of none but himself hath a fool for a master.

Canadian Schoolboys Are Good Marksmen

Win King's Trophy In Empire Competition Twice In Succession
 Canada's schoolboy marksmen for the second time in succession have won the King's trophy in the Empire competition held under the auspices of the National Rifle Association. The Canadian lads showed marked superiority over all other competitors with a record score of 86.96 points.

In second place was South Africa with 83.85, while Britain was third with 68.85.

Fourth place was taken by New Zealand with a score of 63.16.

With 380, Canada also netted the biggest bag of silver and bronze medals awarded for individual scores of 97 and over. South Africa came next with 109 while Britain secured 68.

The Dominion also monopolized the first three places in the shoot for the Junior Imperial Challenge Shield, and Calgary public schools third with 95.4. First and second were won by the east.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted. I was heart sick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth or other dyes do."

Mrs. J. F. T., Montreal.

Recipes For This Week

(By Betty Barclay)

ORANGE SPONGE CAKE

- 2 egg yolks.
- 4 tablespoons orange juice.
- 1/2 tablespoon lemon juice.
- 3/4 cup sugar.
- 1/2 teaspoon grated orange rind.
- 2 egg whites.
- 1 cup flour.
- 1/2 teaspoon soda.

Beat egg yolks with orange and lemon juice until thick and yellow; mix sugar and grated orange rind, and, gradually, to egg yolks; add stiffly-beaten egg whites and cut and fold in flour, sifted four times with soda. Pour into a buttered and floured cake pan, and bake in a moderate oven about forty minutes.

COTTAGE CHEESE PIE

Line a deep pie plate with pie crust and add the following mixed together in the order given.

- 3 well-beaten eggs.
- 1 cup cottage cheese.
- 1 cup shredded coconut.
- 9 tablespoons sugar.
- 1 teaspoon nutmeg.
- 2 cups milk or enough to fill the pie plate.

Bake as you would custard pie, being careful to reduce the heat to insure a firm consistency.

Grading Canadian Potatoes

The Root Vegetables Act of Canada provides that potatoes must be put up by grade—Canada No. 1; Canada No. 2; Canada No. 3, and Canada Fancy—and that on each bag, barrel or other container must be marked, by tag or stencil, the initials of the christian name and full surname and address of the person, firm or corporation offering the potatoes for sale.

With so thorough a preparation at hand as Miller's Worm Powders, the mother who allows her children to suffer from the ravages of worms is unwise and culpably careless. A child subjected to the attacks of worms is always unhappy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without difficulty.

Just As Dangerous

Mother was poking about in the shrubs when she suddenly called out: "Look, Junior! Here's a little green snake!" "You better look out," cautioned Junior. "It may be just as dangerous as a ripe one."

Ceases Publication

After 103 years of publication, the Athenaeum Magazine is disappearing from London news-stands through a merger with the New Statesman and Nation. The new magazine will be committed to no political policy, its sponsors say.

No man is wise enough to ignore the things his wife can teach him.

The Issue In India Voted Century Ago

Retired Official Gives His Opinion Of The Situation

"I have been in India 46 years and cannot help thinking that most of our troubles are due to the fact that in the past, politicians failed to think out the results of their actions to their logical conclusion," said Field Marshal Sir William Birdwood, who has just retired as commander-in-chief in India, in a speech to the London Devonian Society, England.

"I hope that whatever government is in power will remember that the masses of India are illiterate and inarticulate and will see that the safeguards we read about will be real safeguards; and that those people will not be handed over to the intelligentsia who speak in the name of India without having the same affection for the cultivators of the land as we English people have," the field-marshal added.

Asthma Can Be Cured. Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

A Beggar's Blessing

"You don't happen to have a cup of nice hot coffee on you, Mister?" asked a pan-handler of a citizen on King Street, Toronto, and the expression of gratitude when the wherewithal was dropped into his palm was equally original. "God bless your specs," he said heartily, "and keep 'em rose-colored."

Smothering and Fainting Spells

Everything Would Turn Black

Mrs. Andrew Black, Harcourt, N.B., writes: "I had been troubled with smothering and fainting spells and everything in front of me would turn black, and I would fall down in a faint and be unconscious for several minutes. I did not know what to do, until one day I was reading where Milburn's Heart and Nerve Pills had helped so many people and decided I would give them a trial. I used four boxes and found they help me wonderfully."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

GRAIN FUTURES SALES WILL BE INVESTIGATED

Ottawa, Ont.—Does the sale of grain futures operate to the detriment of the producer? This was the "simple, single question" which Sir Josiah Stamp, and his colleagues were asked to determine. Premier Bennett announced in the House of Commons, Sir Josiah, eminent British economist, consented to act as chairman of the commission to conduct this inquiry, at considerable inconvenience to himself.

The government had taken the view that there had been such sharp differences of opinion on this continent and in this country as to the desirability of maintaining markets for the sale of futures in Canada, that it was thought best to secure the services of some one entirely removed from the scene of these conflicts of opinion, Mr. Bennett declared. Hence Sir Josiah had been asked to head the inquiry and had consented.

Two other commissioners will complete the board, one selected by the governments of the prairie provinces, and the other to represent the grain exchanges. They will be selected very soon.

The commission will, in all probability, hold open hearings in Winnipeg, and possibly in other centres in the west. Hon. Robert Weir, Minister of Agriculture, stated. The minister explained that the commission would be given a free hand but as it was desired to get all the information possible and also desirous to hear representatives of all interests affected, open hearings would not doubt be decided upon as the most expedient. The government was desirous that anyone who could throw any light on the problem should be heard.

Expectation is that the investigation will be completed and the report made public in time to guide in the marketing of the next crop. Mr. Weir viewed with favour the international wheat conference to be held in London, England, in May. "All the information we can get on the subject is to the good," he said.

Counsel will be selected to represent the government, the grain exchanges and the producers, according to present plans.

Immigration Restricted

Government Policy Has Helped To Solve Unemployment Problem

Ottawa, Ont.—The government's policy of restricted immigration has materially helped to solve the unemployment problem in the last six months, and has reduced the number of arrivals of new citizens by 53 per cent. over the corresponding period of the previous year, according to Hon. W. A. Gordon, Minister of Immigration and Colonization.

He also pointed out that in the first 11 months of the last fiscal year, 28,728 young Canadian men and women who were resident of the United States, had returned to Canada.

For 11 months of the fiscal year which ended Tuesday, March 31st, 85,810 persons entered the Dominion as compared with 148,712 in the corresponding period of the previous year.

Total number of jobless men placed on farms by the Land Settlement branch of the immigration department numbers 2,300 to the end of February, 1931.

Will Seek Information

Members Of Co-Operative Wholesale Society Of Great Britain Are Here As Observers

Toronto, Ont.—"We are merely in Canada as observers and have no opinions," said George W. Brooks, a director of the Co-Operative Wholesale Society of Great Britain, when interviewed by the press.

However, he provided details of the organization, which comprises 1,141 affiliated societies and 4,020,332 co-operative customers. The company's sales in 1928—its first year—totaled \$500,000, while in the year ending July, 1930, they amounted to \$550,000. Butter holds first place in turnover, sales totalling \$25,500,000, and is followed by flour, sugar, bacon and hams, and tea.

Overseas trade for the year 1930 amounted to \$5,200,000. In addition to this the organization purchased \$6,000,000 worth of grain from the Canadian Wheat Pool.

There have been reports that the society contemplated establishing a branch in Canada.

Winners In Writing Contest

Novel By Calgary Girl Carried On Third Prize

Montreal.—A Dominion-wide contest in novel writing came to an end with the announcement that Raymond Knister, of Port Dover, Ontario, has been awarded first prize of \$2,500 for his winning manuscript. The book will be published by the sponsors of the contest, an Ottawa publishing company.

Second prize of \$1,500 went to Marcia Adney, of Toronto, and Ella B. Wallis, of Calgary, won the third prize of \$1,000. All three books will be published in the near future.

Several manuscripts were thought to be of such merit that the contest judges recommended that they be published also. Included in this latter group were books by Laura Goodman Salverson, Port Arthur, Ontario; Francis Owen, Edmonton; and Isabel E. Henderson, Winnipeg.

The object of the contest was to demonstrate to Canadian readers that 100 per cent. Canadian books rank as high as those published anywhere, and that there are many potential authors in the Dominion.

U.S. Airplane Crash

Knute Rockne, Notre Dame Football Coach, Is Killed

Bazaar, Kas.—Knute Rockne, Notre Dame football coach, plunged to his death with five fellow-passengers and two pilots on a Transcontinental and Western Air Inc. liner in the mid-Kansas grazing country near here.

The plane California-bound from Kansas City, crashed on a farm, killing all eight occupants instantly. Witnesses said the craft, flying through clouds and fog lost a wing in the air and hurtled to the ground like a crippled bird.

The body of Rockne was identified by W. L. Winters, son of William Allen Rockne, of the Emporia Gazette. The famous coach boarded the plane just before its departure from Kansas City, in mist and rain, at 9:15 a.m. He was bound for Hollywood to complete arrangements for making talking pictures.

Was Secretary To Royalty

Lord Stanfordham Passes Away At Advanced Age

London, England.—Lord Stanfordham, secretary to royalty for the past 50 years and said to have possessed more state secrets than any other man, died recently. He was 81 years old.

Born Arthur Bigge, the son of a country vicar, Lord Stanfordham was private secretary to Queen Victoria and at the time of his death was private secretary to the King. He was often referred to as "the man behind the throne."

On March 11, Lord Stanfordham underwent an operation but this resulted in little improvement in his condition.

The private secretary is survived by two daughters, the Hon. Mrs. Victoria Eugenie Adeane, and the Hon. Margaret Bigge. Lady Stanfordham died in 1922.

Appointed Lieut.-Governor

Lt.-Col. Munroe Receives Appointment For Saskatchewan

Ottawa, Ont.—Lt.-Col. Hugh Edwin Munroe, M.D., O.B.E., of Saskatoon, has been appointed Lieutenant-Governor of the province of Saskatchewan. Announcement of the appointment was made by Premier R. B. Bennett. He succeeds Hon. H. W. Newlands. Dr. Munroe is one of the "old timers" of the North West Territories and a prominent medical practitioner of Saskatoon. He has a distinguished war record.

Mr. Newlands retired from office on December 31, 1930. At that time Sir Frederick Haultain was appointed administrator of the province. Because of illness of Sir Frederick, an acting administrator was named, Mr. Justice J. T. Brown, of the Saskatchewan Court of King's Bench, now holding this post.

Would Replace U.S. Grain

Ontario's Grain Requirements May Be Supplied From West

Toronto, Ont.—Western Canadian grains will replace those imported from the United States for use in Ontario if legislation is passed next year, following investigation now being made by the Department of Agriculture, under Dr. J. H. Kennedy. The expected legislation will probably bind grain pools, elevators and feeders of the province in a co-operative arrangement.

LAY PLANS FOR MARKETING OF THE WHEAT CROP

Rome, Italy.—The first steps were taken towards the orderly marketing of the world's next wheat crop. Representatives of Canada, the Argentine, Australia, Bulgaria, Hungary, India, Poland, Rumania, the Soviet Union and Yugoslavia met to discuss preliminaries to the summoning of a formal conference where, it is hoped, a definite agreement will be reached for the sale of the 1931-32 crop.

It was upon the motion of Hon. G. Howard Ferguson, Canada's high commissioner in London, England, and the Dominion's chief delegate at the conference, that the production committee adopted the suggestion of a later conference to deal with marketing the crop which is to come. Mr. Ferguson's motion read, "That this conference, recognizing the importance of orderly marketing of the export surpluses of wheat and being convinced the present low price of wheat on the world's market is a serious factor in the present economic depression, is of the opinion that it is desirable that delegates of countries exporting wheat should meet together as soon as possible to organize on an international basis the exportation of the crop of the year 1931-32."

The motion concluded by suggesting that the United States also be invited to take part in the discussion. One suggestion is that the deliberations should be held in Canada early next summer.

The proposed conference covers a broader field than was originally suggested. As the work of the present wheat conference has proceeded so many divisions of opinion have been revealed that anything like a general agreement among the 48 nations represented appears to be highly improbable. The gulf between the overseas countries and the European wheat-exporting countries seems to be wide.

The Danubian countries again sought tariff preferences in Europe for their wheat. But to this serious objection was again made and proposals involving rationing of production met with like objections. The overseas exporting countries discussed orderly marketing, apart from the conference proper, and encountered so much success that approaches were made to the Dominion countries. They agreed to join a conference to be held next year and the Soviet delegation did likewise, making their agreement, however, conditional on the approval of the Soviet Government.

Then came the formal motion in the wheat production committee by Canada's chief delegate. The committee approved the motion and representatives of all the producing countries concerned met to discuss preliminaries.

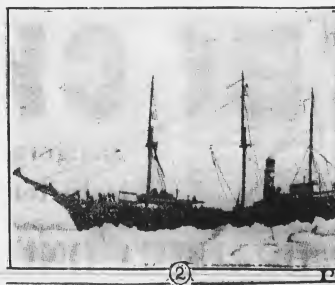

Will Visit Canada

Washington, D.C.—Sir Ronald Lindsay, the British ambassador will visit Canada during the latter part of April. It is expected Sir Ronald, paying his first semi-official visit to the Dominion, will leave Washington about April 28, to go on to Ottawa, Toronto and Montreal.

Seeking New Record

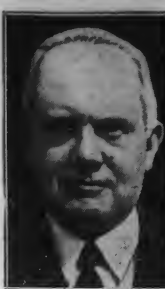

Netheravon, Wiltshire, Eng.—Lieutenant-Commander Glen Kidston, with Lieutenant C. C. Jones, and a wireless operator, set off from here March 31, in an attempt to set a new air record from England to Capetown, South Africa.

SEALING VESSEL EXPLOSION

Twenty-one men are dead, and many injured as a result of the explosion supposed of the powder compartments of the Norwegian ship "Viking" off the coast of Newfoundland. The photograph shows the "Viking." It was in the "Viking" that Fridtjof Nansen, Norwegian explorer, made his first journey north.

MINISTER TO CUBA

Sir John Joyce Broderick, newly appointed British minister to Cuba, photographed when he sailed from New York for England, where he will enjoy a short vacation before taking up his new duties. He was formerly attached to the British embassy in Washington. He sailed March 14.—Associated Press Photo.

Reports Say Ottawa

Plans Domestic Loan

To Cover Obligations Maturing Within Two and a Half Years

Ottawa, Ont.—While there are many rumors of government financing to provide for large maturities within the next few years, no decision as to the plan to be adopted has been reached. Canada paid off her \$25,000,000 maturity in New York, April 1, out of money raised last year. This loan was one of the first war loans, and was floated in 1916.

In respect to the very large obligations which will mature within the next two and a half years there has been no official pronouncement. These total more than a billion dollars. It is the general impression that the government proposes to utilize domestic resources and that a large loan will be floated in Canada. Premier Bennett, in his capacity of finance minister, has the matter in hand, and the policy of the government will be announced in due course.

Look For Better Prices

Believe Canadian Wheat Prices Due For a Rise Shortly

Toronto, Ont.—Belief that Canadian wheat prices are due for a rise shortly, was expressed by C. W. Peterson, of the Farm and Ranch Review, Calgary, Alberta. Europe, contended Mr. Peterson, who is visiting the city, could not continue to produce wheat at present prices and when they did advance their prices the Canadian price would also increase.

United States, he thought, would soon disappear from the wheat market and would become purely an importing country.

Want Health Probe

Urge Public Health Inquiry In Province Of Manitoba

Winnipeg, Man.—Inquiry by a special select committee of the Manitoba legislature into matters of public health in the province was urged in the House recently by J. W. Pratt, Independent member for Birtle. His probe request was supported by Dr. Murdoch MacKay, Liberal, Springfield, and J. B. Laughlin, Conservative, Killarney. The question of state medical aid would have to be considered by the government within a short time, Dr. MacKay believed.

Ripped Fabric Caused

Drillable Disaster

Commission Gives Report On Crash Of R-101

London, England.—The disaster to the dirigible, R-101, which stunned the world when it came down in flames on a hillside near Beauvais, France, last October, killing 48 men, had been attributed to mechanical causes, and not to human failure. The report of the Simon Commission, which made a long study of the disaster, and just made public, attributed the disaster mainly to "a substantial loss of gas in very bumpy weather."

The report considered that it was probable that the tarpaulin of the ship's envelope was ripped. "Something of this sort happened on a previous occasion and no amount of care could assure that it would not happen again," the report said, emphasizing the possibility of mechanical failure in dirigibles as at present constructed.

The commission refused to take a position one way or another regarding the effects of the tragedy on the future of lighter-than-air navigation.

WILL MAINTAIN CLOSE CHECK ON EXPENDITURES

Ottawa, Ont.—"Every department must live within their appropriations; if not, then some gentlemen are going to lose their positions," declared the prime minister in the House of Commons. The House was in committee of supply considering supplementary estimates and had under examination an appropriation amounting to \$55,510,46 to cover unprovided items 1929-1930, as per auditor-general's report. The item finally passed.

Mr. Bennett traced the growth of this annual amount, and asserted that if parliamentary control over appropriations was to be maintained, then discipline must be applied or the whole system would be wrecked. The amount covered by the item had already been paid, and all that was being asked was merely to legalize the expenditures and begin the new fiscal year on April 1 with a clean sheet.

"I agree with the prime minister as to the desirability of exercising the closest possible control over public officials," declared Mr. Mackenzie King, leader of the opposition, but the prime minister should recall that he (Mr. Bennett) had had this for eight months out of the fiscal year while the previous administration had had only four months. In view of that the responsibility for the over-expenditures lay with the government. The items, which had appeared regularly every year, were due, not to over-payments, but to unforeseen expenditures, which did not imply negligence on the part of anyone.

The question of whether the control of the auditor-general began before or after the payment of accounts was raised, the prime minister contending that this official's duty was to check the accuracy of the amounts and the authority for the expenditures. The money, he said, was paid before the auditor-general had a chance. Hon. Charles Stewart (Liberal, Edmonton West), declared that the prime minister would find it the most difficult thing in the world to close out accounts at the end of the fiscal year.

Mr. King recalled that in 1921-1922 the outgoing Conservative government had left an amount of \$2,055,630.86 to be accounted for in the corresponding item for that year. Compared with the sum now under consideration it could be seen, he said, how the last administration had exercised care and caution. The prime minister observed that special reasons had existed then, the magnitude of the sum being due to activities in connection with unemployment relief.

The situation was, said the prime minister, that the present government, in an endeavor to have all things squared away for the beginning of the fiscal year, was seeking authority for the payment of these accounts now instead of placing them in the next supplementary estimates for 1931-1932.

"I am making an endeavor to see that hereafter there will be no over-expenditures by deputy ministers in the administration of their departments."

It might be that his conceptions of his obligations as minister of finance may not be so exacting, continued Mr. Bennett, he desired to make it clear that the appropriations passed by the House must not be exceeded.

WORLD WHEAT PARLEY TO BE HELD IN LONDON

Rome, Italy.—Canada House, at London, England, will be the scene of a conference between representatives of wheat exporting countries of the world. The conference will endeavor to reach agreements for the orderly marketing of the next crop. Hon. G. Howard Ferguson, Canadian High Commissioner, will preside.

The conference will meet on May 18, and its activities will be defined only by Mr. Ferguson's resolution, in which the high commissioner moved that the conference suggest the London meeting, at which delegates of countries exporting wheat should meet to organize, on an international basis, the exportation of next year's crop. The motion also suggested that the United States should be invited to take part in the discussion.

The conference got a free hand to tackle the problem only after a long and strenuous fight recently, in production committee of the world wheat conference. Endeavors were made to circumscribe the activities of the London committee, and to make it, in effect, responsible to the International Institute of Agriculture, under whose auspices the Rome wheat conference was called.

Exporting countries, with Canada leading, strongly opposed any idea of limitations. Mr. Ferguson held the exporters' conference was a distinct, independent organization. "We are not an adjunct of anybody. We are a distinct conference called to discuss a definite problem," he declared. "We shall welcome any information we can get from here that may help us to reach a successful solution, but we ask the committee not to pass any resolution that, instead of helping, will restrict us."

Earthquake Takes Heavy Toll

City Of Managua, In Nicaragua, Is In Ruins

S.S. City of Panama, in Corinth Harbor, Nicaragua.—The City of Managua is in ruins and there are hundreds of homeless, homeless, homeless. United States Marine Corps aviator, said on his arrival here, after witnessing the results of the earthquake which devastated Managua. The city was still on fire when he left, he said. Palmer has some wires here from Managua to scrape up all the medical supplies he could get from this ship and from any other source where they were available.

"The whole town is in ruins," he said. "I don't think there's a building left standing, and there are hundreds of bodies buried."

"The heaviest toll taken was in the penitentiary, which collapsed, and looked as though it had been ground to powder."

"Fire raged through the wreckage, and there was a panic in no time. Martial law was declared immediately."

"The railroad is destroyed, and all the wires are down. You can't get any word outside except by plane to Corinth, and then possibly by radio. "When my plane left Managua the marines had the rescue work well under way."

Wheat Stocks Less

Visible Wheat Supply Shows Big Decrease Over Last Year

Winnipeg, Man.—Decreasing supply of Canadian visible wheat was down at the end of March to 181,499,397 bushels—more than 12,000,000 less than jammed elevators of North America a year ago. According to a report issued by E. A. Ursell, statistician to the Board of Grain Commissioners, stocks declined 2,135,965 bushels during the week ended March 27.

Ocean shipments of Canadian wheat fell off slightly, totalling 2,906,430, as compared with 3,737,809 bushels for the previous week. Notably, the clearance decrease was at United States ports on the Atlantic, where shipments totalled only 977,000 bushels. From Canadian Pacific ports shipments were 1,477,761 bushels. Clearances from Canadian Atlantic ports were 531,669 bushels.

Money Awaits Court Ruling

London, England.—Sums of money which the post office department obtained by opening letters sent from England to Ireland for tickets in the Irish hospital sweepstakes are being held up, pending a ruling by the British home office on what disposition to make of the currency. The sweepstake is not legal here.

NOTES AND COMMENTS

Another musical festival has passed into history, equally as successful as those preceding it. It indicates that young people respond to efforts that are made to promote cultural improvement, and is very encouraging to those who give of their time every year to keep the musical festival very much to the fore.

Automobile accidents are in the majority of instances caused by carelessness. Courtesies of the road are often ignored, and an instance was reported this week to The Journal of people being so thoughtless in the city of Lethbridge that they even cut through a funeral procession.

Fry's Cocoa! Kellogg's Corn Flakes! Wrigley's Chewing Gum! There may be nothing inspirational in these items, but they are names that are household words. What has made them so? The power of advertising! Also they are products which have stood the test of public favor. There has been no "cold feet" policy in regard to advertising. They have not relied on the public knowing them, and cutting advertising on that account. There are new buyers and consumers born every day, and unless the names and merits of already well-known products are kept persistently before the public, the rising generation are apt to know nothing of them.

A country newspaper publisher is often told on soliciting advertising that the people already know all about the local stores, hence there is not the same necessity to advertise as the big fellows do. The big mail order houses are also well-known, yet twice a year they send in hundreds of profusely illustrated catalogues to each small town. They do not rely on being well-known. They send out advertising news of interest in its price appeal and descriptive matter. To combat this, a local retailer must publish each week something of interest about his own store. Otherwise he has himself to blame if would-be customers show no interest in what he has to sell. Business is not secured by a waiting and watching policy.

The Federal government has intimated that the prairie air mail service may be discontinued for the present. On some routes it is reported that it cost over \$30 on an average to carry letters. Under such conditions an air service is not warranted. One reason that the air mail has not been used more by business houses in the towns from Lethbridge west is that practically no advantage was to be obtained. The air mail service has not had a fair chance of proving itself, and until there is a try-out of a complete trans-Canada service, it is not fair to judge results. Were it possible to have letters delivered from Crows Nest points to Regina, Winnipeg and other eastern cities direct, it would undoubtedly result in a greater volume of business. This also applies to many important points in the interior of British Columbia.

The frequency with which planes are making trips on this route through the mountain ranges demonstrates that air travel is increasing. This is in the face of handicaps of very few landing fields. Were more ground facilities provided at frequent intervals on the mountain route, it would give a rapid impetus to passenger flying. People who value time could travel from the interior points to the coast or to Winnipeg in a few hours. Mail would be delivered in less than half the time. The wheels of progress cannot be stopped. The demand for speed in travel and transaction of business must be met, hence the co-operation of railway companies in organizing combined air and rail routes.

Chicago voters gave Big Bill Thompson, former mayor, a remarkable setback when they voted for his opponent, Anton J. Cermak, former immigrant boy, by a majority of 191,916, the biggest on record of any majority vote for a civic candidate, not only in Chicago, but possibly in the entire world. King George should immediately improve in health.

Here and There

In 1930 a total of 9,272,480 cans of vegetables, exclusive of soups, were packed in Canada, an increase of 3,646,282 cans or 64.8 per cent. over the 1929 pack.

The annual harvest of maple sugar and maple syrup is now well under way. Last year total cash value of these products in Canada was \$5,250,620. Most of it comes from the province of Quebec.

"It's a long way to Mool River," crowed six lusty cockerels on the railway platform at Nanaimo recently. It was their first transfer on a 56-day journey from Vancouver Island to Mool River, Natal, South Africa.

In figures drawn from the provincial government statistics, it appears that motor accidents at level crossings during 1930 total only 10451 per cent. of all automobile accidents occurring in the Province of Quebec in that year.

Vanishing cream as a material to improve the complexion of grain kernels will not be tolerated in competitive classes of the World's Grain Exhibition and Conference to be held at Regina in 1932, the Canadian Seed Growers Association announces.

About the end of April wheat harvesting will begin at the Canadian Government Experimental Farm at Ottawa—in greenhouses. There have been built to complete two years' research work in one year and as a result, "we are two years ahead in our work," said L. H. Newman, Dominion Cerealists, recently.

Installation by the Canadian Pacific Telegraphs of a new telegraph carrier system between Toronto and Windsor, increasing telegraph facilities by ten two-way channels, has recently been put in operation. It also provides Windsor and Walkerville with a direct circuit to Montreal over the new carrier system.

Marine history was made when members of the British Royal Academy were commissioned to decorate the interior of the Empress of Britain, 42,500 ton gem of the Canadian Pacific Atlantic fleet, which will make her maiden voyage from England to Quebec in May next. Sir John Lavery, Sir Charles Allom, Frank Brangwyn, W. Heath Robinson and Edmund Dulac were some of the artists.

Addressing the combined Board of Trade and Empire Clubs of Toronto recently, E. W. Beatty chairman and president of the Canadian Pacific Railway, pointed out that the total tax bill of his railway from incorporation to 1929 had been \$105,813,944, while the total value of the original Government contribution to the railway in cash, land and completed sections had been \$91,118,827.

The Strathmore Supply Farm, operated by the Canadian Pacific Railway, won the first five places in all Canada for highest milk production in 1930 for 4-year-old cows; three-year-olds took first and third places; and 2-year-olds took first four places. In the mature class the Farm took second highest milk record. The figures were issued by the Livestock Branch of the Dominion Department of Agriculture.

Artificial Lighting Units May Be Used Instead Of Sunlight In The Grading Of Grain

Grading of grain in Canada is done by the natural light of the northern sky. In an effort to overcome the obvious inconveniences of this method, one of which is the difference in light at the various inspection points, and another, the limitation on time, the National Research Council, at the request of the Board of Grain Commissioners, has devised a series of artificial lighting units. E. B. Ramsay, the Chief Grain Commissioner, and J. D. Fraser, the Chief Grain Inspector, have inspected the results of the experiments and two of the most promising units are being shipped to Winnipeg to be tested.

In order to get sufficient uniformity of illumination the lamps are placed in an inspection stall which is boxed so the inspector cannot look directly at the light. The illumination in one of the units is to be a combination of direct and indirect lighting uniform over a table space about two feet square. Various combinations of mercury and neon lamps have been studied. To the laymen one of the striking results of the experiments has been the difference in effect which various combinations of the lights used have had in showing up the defects or good qualities of the grain examined.

As a part of the general experiment the spectra of light reflected by various samples of wheat have been measured by means of a recording microphotometer. It was found that using light of wave lengths from the far red to about the blue, starchy wheat reflected more light than good, green or frozen wheat; green and frozen wheat approximately the same, and good wheat less than the others. Light of shorter wave lengths gave different results but the final conclusion reached was that there appeared to be no definite absorption of selective reflection of visible light which would make grading by physical means possible.

Dr. D. C. Rose has been conducting the experiments in the John Street laboratories of the council at Ottawa, under the direction of Dr. R. W. Boyle, the director of the Division of Physics. Dr. Rose has been requested to supervise the installation of the lights in Winnipeg.

Market Must Be Regained

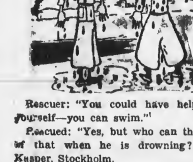

University Professor Stresses Increased Hog Production In Western Provinces

Increased hog production in the next few years was prophesied by Prof. J. P. Sackville, of the University of Alberta, in addressing the Saskatchewan Swine Breeders' Association at dinner at the Kitchener Hotel, Regina.

The need for regaining export markets for hogs was stressed by the speaker, E. P. Brocklebank, director of the Boy's and Girls' Swine Club, outlined the plans of this group to ship a carload of hogs to the Royal Fair next winter, in co-operation with the swine breeders. The president of the association, E. F. Richardson, presided at the dinner.

Source Of Canadian Platinum All the Canadian platinum and allied metals are obtained from the treatment of the Sudbury nickel-copper matte, with the exception of a few ounces of platinum obtained from the black sands of British Columbia, and a small quantity produced as an impure residue in the refining of gold at Trail, British Columbia.

A man of over eighty claims to have made a gramophone that can be heard distinctly at a distance of a mile. All we can say is that he ought to know better at his time of life.

Speed Of Light

Light Always Travels At A Uniform And Fixed Speed, According To Scientists

Light travels always at the same speed, according to the finding of a scientist who thus adds fresh proof of the correctness of Professor Einstein's relatively theory in which it is assumed that the velocity of light is absolute. Prof. George Joos, of Jena University, Germany, claims to have proved the uniformity in the speed of light by the use of a device which he says measures accurately one-thousandth of the length of a light ray.

Free Medical Services

The travelling health clinics which are in operation in the Province of Alberta, under the direction of the Provincial Government, which visit more remote districts to provide free medical services, visited 27 points last year, including 306 school districts. More than 8,000 children were inspected by public health nurses. More than 3,000 were given dental treatment alone.

(By Annette).

THE NEW MODE IS JUST AS KIND TO THE CHILDREN AS THE ADULTS

Any little miss would adore this jumper dress that big sister is wearing at college. It delights in the fact that it is an exact copy too of the grown-up mode. Even to the fabric which is a thin woolen in a small check pattern in light navy blue and white. The belt is blue shiny patent leather.

The tailored blouse chooses a cotton broadcloth in yellow-beige. The circular swaying skirt necessarily attracts much attention with the growing miss, who so loves to feel important in clothes of smart sophistication.

Style No. 187 may be had in sizes 6, 8, 10 and 12 years.

Coral-pink linen with white dotted swiss blouse is so pretty.

Sailor blue wool jersey with white batiste dotted in matching blue is another lovely choice.

Tweeds, tweed-like cottons, woad crepe cotton shantung prints, pique, cotton broadcloth prints, gingham, tub silk, etc., are suitable and smart fabrics.

Spring, the season of prettiest styles, will soon be here. Prepare now by ordering a copy of our new Fashion Magazine. Attractive styles for women, misses and children. And instructive lessons in sewing.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Jerseys Shipped To Alberta

Farmer Of Province Said To Be Enthusiastic Over Stock

Every one is aware of the troubles of the Western wheat grower. With the high price of wheat in recent years every one forgot about the dairy cow, but, as usual, even the west has realized at last that there is still need of the dairy cow in their farming operations.

One of the large creamery operations in Alberta, early in 1928, decided they could not do better than to encourage their 22,000 patrons wherever possible to buy Jersey cows and that the creamery would undertake to assist in the purchasing of these necessary animals.

This company operates in British Columbia and saw there what an asset the Jersey was to the community. They even realized this, more fully when Phil Fleming, the western Jersey salesman, told them that part of their success in British Columbia was due to the high quality of butter they produced and also to the fact that with the large globules in Jersey milk there was less waste in churning—that is less butterfat went out in the buttermilk.

Well, to make a long story short, this is what happened in Alberta during the past summer. There has already been shipped into the province 225 head of pure bred Jerseys. Carloads came from all over the Dominion and from the United States. The farmers are very enthusiastic over these Jerseys, which have proven very hardy, gentle cattle, good foragers and best of all very economic producers of butterfat. There is a wonderful market for Jerseys in Alberta which is following along the lines of development, but even more rapidly than that which has taken place in the Maritime Provinces in recent years.

Possible To Cut Loss

Chick Mortality Can Be Prevented To Great Extent

With the complete elimination of pullos which is definitely possible through strict elimination of reactors in a flock as determined by the blood test, very considerable savings to Canadian farmers and poultrymen in chick loss are assured. Tests carried out over a period of years by the poultry division of the Dominion experimental farms indicate conclusively that complete elimination is possible and that chick mortality from this cause can be similarly decreased. Pullos alone is responsible for chick losses running into millions of dollars annually, and, to use the words of F. C. Elford, Dominion poultry husbandman, "much if not all of this tremendous loss is preventable."

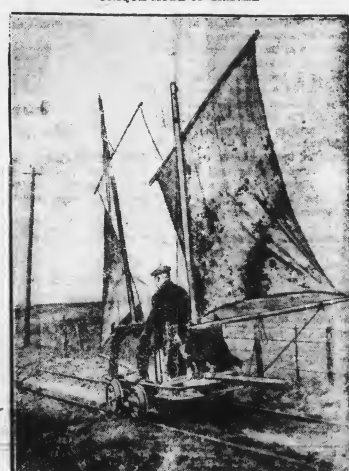

Cadmium In Canada

Cadmium, a by-product obtained in the production of zinc, was produced in Canada for the first time at Trail, British Columbia, early in 1928. Considerable quantities of the metal are employed in Canada, chiefly for plating purposes and because of this use in connection with the radio and automobile industries, the consumption has increased very rapidly.

"What shall I wear for my screen test?"

"How about a filmy dress?"

UNIQUE MODE OF TRAVEL

With five miles to and from work to travel each day, and with no means of transportation, W. H. Slater, a retired naval officer, devised this ingenious means of reaching his home at Cliff, Kent, England. The "rail-train" or land yacht, is constructed from an old quarry truck chassis and axles, and travels over the rails of the abandoned quarry at a fair rate of speed.

LUCKY WINNER

Mary Pacheco, of New Bedford, Mass., a 21-year-old seamstress, bought a dollar sweepstake ticket to get rid of an importunate salesman. She won the \$40,000 prize in the Army and Navy Veterans of Canada draw, and has just received cheque of \$38,300, her profits after deduction of taxes.

Decide Menus Are Dull

Gastronomic Futurists Of Europe Urge More Beauty In Food

European Gastronomic Futurists, sitting at an Academy of Good Eating, have decided that our present menus are too dull and need more color and perfume; that talking at the table is as sacrilegious as talking in church, and that the knife and fork must be suppressed.

Good food must be artistic, like sunsets and oil paintings, the academy decided and forthwith set about drafting an entire new set of recipes. The Academy would turn the kitchen into mixed laboratory-beauty-shop with all sorts of scientific instruments. Good cooking would be a science, not an art, and the cook would follow a formula, like a chemist mixing drugs.

The Academy believes in music and perfume between courses. Before any dish is served, special music and a perfume to fit it are introduced. With woodcock, for example, there would be music of the hunting horns and perfume of the forest in October. The Academy would end after dinner speeches. Oratory and cooking never mix.

The Academy suggests that between courses many beautiful and attractive dishes of food be carried to the table and passed rapidly under the noses and eyes of the guests to excite the curiosity, surprise and imagination. These foods would not be eaten. There would also be a "food cocktail," one spoon filled with a concoction of a dozen tastes and perfumes.

Arrival Delayed

New Yorker tells the story about a Scotch friend, who hurried home to ask his wife how she'd like a studio piano, and when she admitted it would certainly give tone to their drawing room, and questioned him as to when it would arrive, admitted that he wasn't quite sure because he had only purchased a ticket for it a few hours before and that the racket wouldn't take place for another week.

War-Time Pilots Have Plan For Establishment Of A Royal Canadian Air Force Reserve

Two Most Important Factors

Regularity and Quiet Necessary In Feeding Of Livestock

An authority on the feeding and fattening of livestock has pointed out that the two most important factors in the feeding of livestock, outside of the actual feed itself, are regularity and quiet. He might have also added that these same two factors, particularly the former, are two of the most neglected.

There is a certain temperament to a group of steers which are being fed, and in which there are two important ways in which it can be upset. The most serious is an irregular system of feeding which keeps the animals standing and restless for an unusual length of time and which cuts down the amount of feed available for turning into fat. The same thing occurs when the feeder neglects common precautions of quiet and order in handling and working around the cattle.

These are considered small matters by many feeders, and other neglects in connection with the stock may tend to mask their importance. The fact remains that they are important and are not overlooked by the man who has the most pride in his cattle or in his ability to make them pay dividends even in the face of low prices.

BETTY BARCLAY'S HELPFUL HINTS

Today Betty Says:

Unless we get sufficient vitamin "C" each day, tooth decay is very likely to set in. One prominent authority, Dr. Milton Theodore Hanke, of the University of Chicago, recommends a full pint of orange juice daily with the juice of a lemon added, as the proper daily amount of Vitamin "C" necessary to check dental decay. It's easy enough to make children take this kind of medicine. To them, such a drink is a luxury at any time of the day.

When following recipes, make your teaspoons and tablespoons level unless otherwise specified. Those who fail to do this cannot blame the recipe if anything goes wrong.

When the Current Goes Off

Everything Stops In This Highly Electrified Age

It makes us laugh, with a hearty old laugh, to see how completely our homes go to pieces nowadays when anything happens to the electric current. It used to be that when a storm broke down the electric wires, the only thing that happened was that the light went out. Now, when the light goes out, everything else quits too. There is no ice in the ice-box, no music in the piano, no coffee in the percolator, no dialogue in the radio, no toast in the toaster; the vacuum cleaner stands silent in the corner. Sister can't curl her hair. Brother's toy train stops running, the heat in the bathroom goes off, the bed-warmer doesn't work, and the orange-squeezer stops squeezing right in the middle of an orange. It's just a question of gathering around a log fire and marking time till the storm abates.

"Mr." and "Mrs."

The titles "Mr." and "Mrs." now common property, were not always so freely bestowed. In the seventeenth century only such persons as scientists and physicians and their wives prattled these titles to their names. The title for those above the rank of servant but below that of gentleman was "Goodman" or "Goodwife."

"I waited twenty years for my wife," writes a correspondent. "That'll teach him not to go shopping with her again."

Efforts will be made to establish a Royal Canadian Air Force reserve following discussion at the first reunion dinner of the Canadian War-time Pilots and Observers' Association held at Ottawa. Under the scheme senior officers who served overseas will be enabled to continue flying and through that medium increase public enthusiasm in air transportation.

Friendships were renewed and bonds of service recalled at the gathering of pilots. It was decided to make the dinner an annual affair and it will be held in Montreal next year.

Suggestion that Rockcliffe Field, Ottawa, be named "Baker Field," after the distinguished Canadian aviator, Lt.-Col. W. G. Barker, V.C., who was killed in an aeroplane accident there some months ago, came from J. A. D. McCurdy, of Montreal, first Canadian to fly a "plane. He also suggested St. Hubert aerodrome, Montreal, be renamed "Bishop Field" after Col. W. A. Bishop, V.C., famous war ace, who was the guest of honor.

Besides Mr. McCurdy and Col. Bishop, Hon. D. M. Sutherland, Minister of National Defence; Major-General J. H. MacBrien, president of the Aviation League of Canada, and Major-General A. G. L. McCaughton, chief of staff, were among the speakers.

Seeking to increase enthusiasm for gliding, Aviation League of Canada adopted a motion requesting the Department of National Defence to establish a curriculum of training for glider-flying. Accident were responsible for holding down the popularity of gliding in the Dominion, speakers held. It was suggested the defence department might supervise designs for gliders to be used in this country.

Close co-operation between the league and the Canadian Flying Clubs Association will be maintained. It was decided, as an agency for the development of Canadian aeronautics. It was decided that the national aircraft model contest which proved a success in 1928, should be repeated this year. Venue and date for the contest will be set later.

Needed Better Treatment

Indian Medicine Man Lost Faith In Drum Beating

Out in Kiplax, B.C., lives an Indian medicine man who is not at all sure about his own medicine, according to a letter received at United Church Home Missions office in Toronto, from Miss Menzies, field manager, who does district nursing on the Kiplax reserve.

In her letter Miss Menzies says the medicine man called upon her for attention. Previously he had always refused her offers of aid. When she asked the patient why he did not beat the drum for himself and take his own medicine, he replied: "Sometime drum alright. Sometime medicine alright. But me sick."

Cadmium In Canada

Cadmium, a by-product obtained in the production of zinc, was produced in Canada for the first time at Trail, British Columbia, early in 1928. Considerable quantities of the metal are employed in Canada, chiefly for plating purposes and because of this use in connection with the radio and automobile industries, the consumption has increased very rapidly.

A Good Opportunity

The farm boys and girls who took special agricultural courses during the winter will find ample scope on the home farm to try out their recently acquired knowledge. The problems were never bigger and the need of accurate information was never greater than now, says the Farmers' Advocate.

A study of the causes of heart disease has been started by New York State health officials.

"You seem sad—have you lost any body?"

"Quite the opposite—I have just had triplicate."—Moustique, Charlot.

Which Would Do Most Work?

Long Hair is like a blanket. Leave it on and your horses sweat excessively and at night this cold wet blanket of long hair chills the horse and prevents proper rest. Horses in run down condition are easy prey to cold, pneumonia and other ills.

New Stewart CLIPMASTER is an electric clipper for clipping horses and cows, weighs only 3 1/2 lbs. and easily held in hand like a pocket knife. Works from light socket, has 25 ft. extension cord, special universal motor. Price, complete, only \$28.75.

Flexible Shaft Co. Limited 340 Carlaw Ave., Toronto

Remove the long hair. Clipping gives new life to horses—they do more work on less feed—are dry at night and get proper rest. Clipped horses easily grounded, less subject to illness, always fit for full day's work. Keep your horses on the job. **CLIP NOW.**

STEWART No. 1 Clipper Machine. Clips fast. Lasts many years. Strong, simple, ball-bearing, easy running, stays sharp. Clips horses and cows. Price only \$15.00. If your dealer cannot supply STEWART machine, send \$2.00 to factory, pay balance on arrival. Satisfaction or Money Refunded.

STEWART

WORLD HAPPENINGS BRIEFLY TOLD

The next session of congress will probably see restriction of immigration from Canada to about 4,000 annually.

A general election in Britain before the end of the present year was predicted in an address by S. K. Radcliffe, British journalist.

The visa fee for Canadians going into China has not been increased so far, it was learned at the Chinese consulate at Ottawa.

A visit to Canada by Lord Jellicoe, as a delegate to the British Empire Service League meeting at Niagara Falls, is expected to take place in August.

Serious losses through outbreak are predicted for 1931, in Saskatchewan, if average weather conditions persist, according to a warning by the Department of Agriculture.

Preservation by Canada of early specimens of architecture was urged at a meeting of the Royal Canadian Institute by Prof. E. R. Arthur, of Toronto.

About fifteen million years ago giant snails fifteen feet long climbed around the stern cliffs of Quebec. A piece of the shell of one of these monsters of the Ordovician period has been found imbedded in a limestone cliff on Viaduct Hill.

The ban on the use of dogs in hunting deer may be brought into effect by legislation at the present session of the Ontario legislature. After several contentious sessions, the fish and game committee voted 10 to 9 in favor of continuing the use of dogs.

Official notice has been given that the Army and Navy Veterans of Canada will seek power at the present session of parliament to operate sweepstakes. The association's charter would be amended, according to a notice in a recent copy of the Canada Gazette.

Dr. Roland Hughes, of Philadelphia, explained to the Royal Society of Medicine, meeting in London, England, a new iodine compound to be used for making X-rays of the kidneys and bladder. The new compound is expected to considerably advance the technique of diagnosis of diseases of those organs.

Contest Shows Girls Are Better Sleepers

And Less Grouchy In Morning Than Boys, Says Doctor

Girls are far better sleepers than men, and as a result feel more peppy and less grouchy in the morning, Dr. D. Laird, of Colgate University, said in an address at Ottawa.

An "intercollegiate good sleep contest" between boys of Colgate and girls at Skidmore showed that girls have less trouble going to sleep, wake up fewer times and have fewer dreams.

"If you need an alarm clock to awaken you, then you need more sleep," the slumber expert said.

Wife: "Why are you sad?"
Husband: "I've lost £1,000, and £5 was mine."—Buen Humor, Madrid.

W. N. U. 1894

SUNDAY SCHOOL LESSON

APRIL 12

THE PRODIGAL SON

Golden Text: "There is joy in the presence of the angels of God over one sinner that repenteth."—Luke 15, 10.

Devotional Reading: Isaiah 61.2, 6-11.

Explanations and Comments

The Parable of the Prodigal Son; the Son Sinning and In Want, verses 11-16.—As we first see the prodigal son, he is a picture of supreme selfishness. He demands from his father the portion of his property that would legally be his, and upon receiving it he betakes himself to a far country. Every one of us is making some demand upon life. It may be shrouded from the house for the whole world, but it is there, and it is acting of our life. The whole cry of some men is "Give me, Give me!" Never mind the price. Never mind what it costs of the finer things—the love, the honor, the joy of a clean soul, the pain of others. "Give me the portion of goods that falleth to me!"—James Reid.

How far will selfishness carry one if he follows it to the end? It carries the prodigal steadily downward. In the far country the wayward boy has his reckless fling. He becomes a spendthrift and a profligate—he wastes his substance with riotous living. He loses his fine friends and his friends, his good food, his good garments, and at last he comes to a field and the company of swine. Even the husks or pods of the carob tree given the swine are welcomed as food, for he is in sore want.

Riotous living may have for us no lure, but we may be guilty, nevertheless, of squandering our portion, be it youth, talents, education, time, opportunity, life.

The Son Coming To Himself, verses 17-19.—Referring to the prodigal son, the picture of the Prodigal Son in the Tate Gallery, London, England, W. L. Watkinson said: "It is a masterpiece. The prodigal son, himself, is a very melancholy figure, and as for the company, they are simply fiendish, most diabolical beasts. But what struck me most of all is that the great painter had put in a few dabs of red. That is the poetic touch. The prodigal cartoon Swan has painted in a few red poppies." There is a bright spot in the dark picture of the parable—the prodigal "comes to himself."

The Return and the Father's Forgiveness, verses 20-24.—The prodigal immediately carries out his high resolve. He returns in rags and tatters, a gaunt and unkempt vagabond. "It is often a long journey from a resolution to its realization. The journey is frequently so long that it is never completed, and the resolve never becomes a reality. This is true because in so many instances the weak resolution has nothing to back it up except a bit of idealism and the weakened will. In the will of the prodigal there was still life and power."

We can picture him as he travels the long weary stretches back to his home, rehearsing in his mind the appeal he proposes to make there. How will his father receive him? He has returned on no greater terms than to be received as a hired servant. But his father's love is far larger than he dreams. While he is yet afar off his father sees him and is moved with compassion; he runs to meet and kiss him.

"Get a great way off he saw me, ran to kiss me as I came." As I was my father loved me, loved me in my sin and shame."—Terstegen.

Discounts Russian Wheat Menace

Predicts That Within Five Years There Will Be a World Clamor

The dark shadow of Russia on the wheat marketing picture will vanish gradually. Within five years, there will be a world clamor for Alberta wheat.

Such were two of the main points in an optimistic address, delivered by Premier J. E. Brownlee, at the annual banquet of the Alberta Association of Professional Engineers in Edmonton. At the time he was replying to the toast to "The Province of Alberta."

Declaring that Russia was at the lowest margin upon which human life survived, Mr. Brownlee said it was evident that the country would move to higher standards of living.

Saskatchewan Bronze Turkeys W. E. Sellers, of St. Albans, Sask., who has been showing his bronze turkeys at the fall and winter poultry shows again this year, has had another successful season. At the major shows held at Winnipeg, Saskatoon, Yorkton and Moose Jaw, his wins with turkeys included 7 firsts, 7 seconds, 2 thirds, 4 fourths, 5 fifths, 2 silver cups, 4 specials and 3 championships.

May Enlarge Power Plant The Saskatchewan Power Commission is considering a considerable amount of machinery to the Saskatoon plant, to cost in the neighborhood of \$400,000. No additional buildings, however, will be required. Construction of additional transmission lines throughout the Saskatoon district necessitated the enlargement of the plant.

Queer Place For Chapel

Four Bridges In England Have Church On Them

Wakefield's historic bridge over the River Calder—one of the four bridges in England to have a chantry chapel built upon it—is to be relieved of much of its traffic by the erection of a new bridge near by.

Such a bridge has long been necessary, since the present one is much too narrow to accommodate the heavy stream of traffic flowing between Leeds and Sheffield. The present bridge is to remain with its famous chapel in its historic position. The chapel has been used as a bacon factory, an old clothes shop, a library, a dairy, a corn factor's office, a jail and, since its restoration in 1842, as a church.

British Wholesale Society

May Establish Packing Plant In Western Canada

The Toronto Globe publishes the following despatch from Ottawa: "Representatives of the Co-operative Wholesale Society, with headquarters at Manchester and hundreds of stores throughout England, had a conference with Hon. Robert Weir, Minister of Agriculture. It is understood the 'Co-Op.' as it is popularly known in Canada, is contemplating establishment in Canada. The visitors also are looking over the ground to see what they can purchase from the country in the way of food products.

"Their packing plant may be established in western Canada. H. S. Arkell, superintendent, and J. M. King, secretary of the Canadian Livestock Co-Operatives, accompanied them."

Wear On Shoes

The U.S. Bureau of Standards in Washington, D.C., has a walking machine for testing the life of shoe leather. In 24 hours the machine gives the equivalent of several months of wear to a pair of shoes, while observers study the reaction of the leather to the severe strain of the test.

Some grades of silk have been cheaper in London recently than they have been for 100 years.

In a recent month Norway exported 16,800 tons of fish.

The Milky way of the heavens is said to contain approximately 30,000 million fixed stars.

Delegation May Bring Better Trade Relations

Increased Business With Argentine May Result From Visit

The visit of the Canadian trade delegation has aroused the press of Buenos Aires to comment very favorably on the prospects of closer trade relations between the two countries.

It has even been suggested that negotiations be initiated for a mutual understanding between the Argentine and Canada on the all-important question of marketing wheat. Both countries, it is pointed out, would greatly benefit by such a move, although a basis of any such agreement has not yet been suggested.

Cordial discussions took place over a week-end between members of the Canadian delegation and representatives of the Argentine Government. Arising out of these discussions, it is confidently anticipated more profitable future business will result for both countries.

This Motorist Was Lucky

Train Smashed Car But Driver Escaped With Minor Injuries

Motorists who race locomotives to grade crossings seem to be blessed sometimes with an amazing good fortune. The driver of an automobile in the Southern States, recently was hit amidships by a yard engine. His life was saved by little short of a miracle. The locomotive crushed the wheels of his automobile, the chassis of the car dropped to the railroad tracks, and the automobile and driver were pushed along the track at a good rate of speed for more than 150 feet. The driver escaped with minor cuts and bruises. He collected the spare parts of his automobile, and aided by the railroad wrecking crew managed to get his smashed motor car to a vacant lot.

Branch Line Construction

Construction Programme Of C.N.R. Is Proceeding As Authorized In 1930

All the branch lines of the Canadian National Railways authorized for construction in 1927, were completed by the end of 1930, according to a return tabled in the House of Commons by Hon. R. J. Manion, Minister of Railways. Last year \$822,360.97 was spent to finish the work, making a total spent on the 14 branches authorized of \$13,127,760.03. Construction is proceeding on the branch lines to which parliament gave authorization in 1930. Seventeen of these accounted for an expenditure of \$13,222,718.96 last year. For the current year the work will cost an estimated figure of \$3,750,000.

Canada's Fresh Water Area

More than half the fresh water of the globe is contained in inland waters of Canada and twenty different varieties of food fishes are obtained from these in abundance by commercial fishermen each year. Inland commercial fishing is carried on in six provinces and in the Yukon Territory.

WASHES
VANISH QUICK
"My face was covered with itching sores" ended this itching. It cleared up in a day. "My skin was not soch-a-Saits" today. All druggists.

BLACKHEADS

Don't suffer any longer from these unsightly blemishes. Overcome them at home! Get 2 oz. Peroxide Powder from your druggist. Sprinkle a little on the face cloth, apply with a circular motion and the blackheads will be all WASHED AWAY. Satisfaction or money returned.

Free Port Motion Defeated

Amendment To Safeguard Western Agriculture Passed By Alberta

Side-tracked in favor of an amendment proposed by George MacLachlan, U.F.A. member for Pembina, more directly concerned with "safeguarding" western agricultural interests, than with the original motion, the resolution proposed by W. R. Howson, Liberal member for Edmonton, urging that Port Churchill be made a free port of entry for British goods for home fish consumption in Alberta, met a dreary fate in the Alberta legislature.

Mr. MacLachlan's amendment, which was substituted for another amendment proposed by Col. F. C. Jamieson, Conservative member for Edmonton, read: "That this assembly hereby affirms its support of all efforts to encourage reciprocal trade between Great Britain and Canada and to the substantial extension of the British preference to encourage such trade;

"That pending a general substantial revision downwards of all tariff, this assembly recommends to the Dominion government that the agricultural industry of western Canada be placed on a parity with other industries of Canada either by stabilization of prices or by careful examination of the incidence of the tariff schedule in order to assure that the economic interest of the farmers of western Canada be adequately and justly safeguarded."

Unemployment Relief

Impossible For Country To Continue Present System Indefinitely

Is the country going to continue indefinitely the existing wasteful and uneconomic system of relief? At present there is no reason to assume that the percentage of unemployment next winter will be any less. The country, the provinces and the cities cannot continue indefinitely expending millions of dollars in direct relief or in public works that are unproductive. A more business-like system will have to be devised for looking after men out of work, and the time to prepare for next winter is now. It may be some years before the problem of unemployment disappears and a more practical method of solving it will have to be evolved.—Calgary Herald.

Morocco plans to develop its coal and iron ore resources.

Make Your Windows Pay

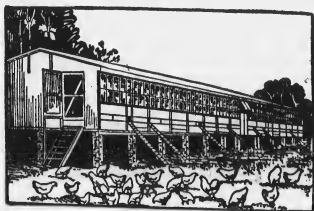

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Personal and Local

Mrs. H. C. McBurney spent a few days with friends in Calgary.

Miss Margaret and Miss Ethel Dunlop spent Easter in Lethbridge.

The Badminton club will hold a dance in the Grand Union hotel.

Ruth Morrison is home from college at Victoria for the Easter vacation.

Our doubts are traitors and make us lose the good we oft might win by fearing to attempt — Shakespeare.

Miss Edna Fairhurst spent the Easter holidays visiting her sister Hilda, at Lethbridge.

Arthur Kirkby spent the Easter holidays visiting his parent's home in Calgary.

Mrs. Arthur Graham came down from Calgary to spend Easter holidays here.

Over three million already sold—Star dollar books. A library of best sellers within the reach of all. See them at H. C. McBurney's drug store.

Wyndham Jones and Everett Price are home from Calgary to spend the Easter holidays.

Verna MacDonald was a Lethbridge visitor during the Easter holidays.

Mr. and Mrs. R. G. Powell of Calgary and their little son spent Easter holidays with Mr. Powell's parents.

Winnifred Dunlop came home from Lethbridge to spend the Easter holidays with her mother, Mrs. R. M. Dunlop.

Several hiking parties under the guidance of Rev. A. E. Larke have this week taken advantage of the school holidays.

Oscar Kubin, who has been at Lacombe for some time with Charlie Graham, is now here assisting George Graham in the spring paint up campaign.

Mr. and Mrs. Walter S. Purvis made a brief visit in town on Saturday, on their way from North Bend, Oregon, to Calgary. It is reported that Mr. Purvis will go on the sales staff of International Coal Co.

To day is the 14th anniversary of VIMY RIDGE.

Mrs. H. V. Hummel and infant son returned on Friday from Kimberley, accompanied by her mother, Mrs. J. H. Warren, who will stay for a short visit.

Mr. and Mrs. Hurdman McLeod left on Monday for Winnipeg, being driven to Lethbridge by J. A. McDonald, of the Empire hotel, where they embarked on the mail plane for the city, which they reached on Tuesday morning.

Miss Margaret Robinson and her mother, Mrs. M. W. Robinson, left Wednesday morning for Calgary. Miss Robinson will spend a few days in the city before returning to Coleman.

Emanuel Meren, aged 1 year, 10 months and five days, of West Coleman, died of pneumonia on April 2. The funeral was held on April 3. Lebers in Catholic church at 1.30.

Mrs. J. Fisher and daughters, Helen and Pearl, of Spring Point, and Mrs. C. Altham and daughter Betty, of Macleod, were the guests of Mr. and Mrs. T. Holstead for a few days this week.

A. Dewar offers to fly his pigeons against any in Coleman, on a member of the homing club reports. This is not official W. Roughhead lost a prize bird, which originally came from Vancouver. It probably took flight for the coast where it is warmer.

Among those from a distance who attended the funeral of David McLeod were Mr. and Mrs. Mike Murphy of Medicine Hat, Robert Livett and Angus J. Morrison of Calgary, Fraser McLeod of Cadomin, and Dave's brother Fraser McLeod of Edmonton.

Mrs. Kilgannon left this week to visit her daughter Mary in Los Angeles and expects to be away for three months. Her daughter, Kathleen, now in the Bank of Commerce at Lomond, accompanied her and will spend three weeks vacation visiting friends in the States.

S. McDowell of the government telephones, Blairmore, was a pallbearer at the funeral of George Scott, who was killed last Saturday at Alderson while unloading poles for the telephone department. His parents lived at Lethbridge for over 40 years. The funeral was one of the largest seen in the city. Mr. McDowell remarked that at intersections some auto drivers showed a deplorable lack of respect by cutting through the funeral procession.

The annual meeting of Coleman tennis club was held in the council chamber on Monday night thirteen members present. Officers elected were Geo. Kellock, hon. president; O. E. S. Whiteside, hon. vice-president; Luke Lindoe, president; A. F. Short, secretary treasurer. A general discussion on finances was the principal item of business. R. F. Barnes is convener of the annual tournament committee.

Floral Tributes at David McLeod's Funeral

Everybody Shifts Expertly and Silently with McLAUGHLIN-BUICK'S Syncro-Mesh

No matter how expert a driver you may be, McLaughlin-Buick's Silent Syncro-Mesh transmission enables you to shift gears more quickly, more easily and more quietly, for the gears will not clash. Driving is safer, too, for when the need arises you can shift from high to second gear instantly. As a feature of all McLaughlin-Buick Straight Eights, the Silent Syncro-Mesh transmission is making better drivers of fine-car owners—of more than 50 out of every 100 motorists who buy eights in McLaughlin-Buick's price range.*

Twenty luxurious models, from \$1,290 to \$2,900, at factory, Oshawa. The advantages of the GMAC deferred payment plan, and the protection of the General Motors Owner Service Policy are available to every purchaser.

*Compiled from latest available registrations supplied by Night Director's Bureau.

Owing to their popularity, the present models of 1931 McLaughlin-Buick Straight Eights will be continued throughout the coming summer and fall.
